1. About Sogno Enterprise

Sogno Enterprise is an AI-driven cybersecurity and enterprise-software company headquartered in Algiers, Algeria, with satellite engineering hubs in Tizi-Ouzou and Oran. Founded in 2019, the company designs intelligent security and knowledge-management products that help mid-size and large organizations protect their data, automate compliance, and make faster decisions from their internal information.

Sogno Enterprise employs approximately 240 people across engineering, security research, customer success, and corporate functions, and serves clients across North Africa, the Gulf, and Southern Europe.

2. Mission Statement

To make enterprise data both safer and easier to use — by building AI systems that understand an organization's knowledge as well as they defend it.

3. Vision Statement

A future in which every organization, regardless of size, can operate with the security posture and institutional memory of a company ten times its size — where knowledge is never lost to turnover, and systems are never left exposed by oversight.

4. Core Values

- **Security by default** — every product decision is evaluated first through a security and privacy lens, not as an afterthought.
- **Clarity over cleverness** — documentation, code, and communication should be understandable by the next person, not just the author.
- **Ownership** — employees are trusted with real responsibility and are expected to see problems through to resolution.
- **Rigor with humility** — we test our assumptions, welcome challenge, and change course when the evidence says we should.
- **Respect for people's time** — meetings, processes, and tools exist to serve the work, not the other way around.

5. Products & Services

5.1 SentinellQ — AI Threat Detection Platform

A machine-learning-based security monitoring platform that analyzes network and endpoint telemetry in real time to detect anomalies, flag potential intrusions, and recommend containment actions to security teams.

5.2 EnterpriseAI — Retrieval-Augmented Knowledge Assistant

An internal-knowledge assistant that lets employees ask natural-language questions across company policy, engineering, and product documentation, with role-based access control ensuring each employee only retrieves information they are authorized to see.

5.3 VaultLayer — Data Protection & Access Governance

A data-classification and access-governance suite that helps compliance teams track where sensitive data lives, who can access it, and whether that access still matches business need.

5.4 Professional & Managed Services

Security assessments, deployment support, and managed monitoring for clients who prefer Sogno Enterprise to operate parts of their security stack directly.

6. Company History

- **2019** — Founded in Algiers by a small team of security engineers and researchers, initially focused on penetration-testing services.
- **2020** — Shipped the first version of SentinellQ; opened a second office in Tizi-Ouzou to tap into the region's engineering graduates.
- **2022** — Raised a Series A round and expanded into the Gulf market; grew headcount past 100.
- **2023** — Launched VaultLayer following growing client demand for data-governance tooling alongside threat detection.
- **2025** — Began development of EnterpriseAI, an internal knowledge assistant later extended into a client-facing product.
- **2026** — Opened a third engineering hub in Oran; current version of this manual reflects the organization as of March 2026.

7. Organizational Structure

Sogno Entreprise operates under a functional structure led by the Executive Committee, with department heads reporting directly to the CEO or COO. Cross-functional initiatives (major product launches, security incidents, compliance audits) are run through temporary working groups that draw members from multiple departments for the duration of the initiative.

8. Departments

- **People & Culture (HR)** — recruitment, onboarding, benefits, employee relations, performance management.
- **Information Technology & Security** — internal IT systems, device management, network and information security.
- **Finance** — accounting, payroll, procurement, budgeting, financial reporting.
- **Operations** — facilities, business continuity, vendor management, workplace services.
- **Engineering** — product development, platform infrastructure, quality assurance, release management.
- **Customer Success & Product** — customer support, account management, product strategy.

9. Office Locations

9.1 Algiers — Headquarters

Bab Ezzouar Business District, Algiers 16000. Houses the Executive Committee, Finance, People & Culture, and the Customer Success team.

9.2 Tizi-Ouzou — Engineering Hub

Novo Tech Park, Tizi-Ouzou 15000. Primary home of the Engineering and Security Research teams, and the site of the annual Sogno Graduate Program.

9.3 Oran — Engineering Hub

Oran Digital Campus, Oran 31000. Opened in 2026 to support platform-infrastructure and product-engineering growth.

9.4 Remote & Hybrid Staff

A portion of Engineering and Customer Success staff work on approved remote or hybrid arrangements; see the Remote Work Policy (SGN-HR-02) for eligibility and expectations.

10. Working Principles

- Default to documenting decisions in writing so the reasoning survives beyond the meeting where it was made.
- Escalate early — a small unresolved risk raised in week one is cheaper than the same risk discovered in week four.
- Prefer asynchronous updates over status meetings wherever the update doesn't require real-time discussion.
- Every policy and procedure in this knowledge base has a named document owner accountable for keeping it current.

11. Leadership Structure

- Karim Ouahab — Chief Executive Officer
- Yasmine Terki — Chief Operating Officer
- Farid Boudiaf — Chief Technology Officer
- Nadia Belkacem — Director of People & Culture
- Amine Cherfaoui — Chief Information Security Officer
- Lynda Aït Ahmed — VP, Customer Success & Product

The Executive Committee meets weekly and is jointly responsible for company strategy, budget approval, and escalated risk decisions. Department heads outside the Executive Committee report through their respective C-level or VP sponsor.

Revision History

Version	Date	Author	Summary of Changes
1.0	14 Feb 2022	N. Belkacem	Initial release.
2.0	03 Jun 2024	N. Belkacem	Added VaultLayer to product section; up-dated headcount.
3.0	19 Sep 2025	N. Belkacem	Added EnterpriseAI product entry; refreshed leadership list.
3.1	10 Jan 2026	N. Belkacem	Updated office locations to add Oran hub (planned).
3.2	01 Mar 2026	N. Belkacem	Oran hub confirmed opened; annual review of values and principles.
