## 1. Purpose

---

This document describes how Sogno Enterprise's Customer Support team handles client requests across SentinellQ, EnterpriseAI, and VaultLayer.

## 2. Support Process

---

Requests arrive through the client portal, email, or (for Enterprise-tier clients) a dedicated Slack Connect channel, and are logged as a ticket in the support system with a priority level assigned at intake.

## 3. Response Times

---

- **Critical** (production security impact): first response within 30 minutes, 24/7.
- **High**: first response within 4 business hours.
- **Medium**: first response within 1 business day.
- **Low**: first response within 3 business days.

## 4. Escalation

---

Tickets unresolved within their target resolution window are automatically escalated to the Support team lead; Critical tickets escalate to Engineering on-call immediately if a product defect is suspected, per Engineering Incident Management (SGN-ENG-04).

## 5. Customer Communication

---

All customer communication should be clear, jargon-appropriate to the client's technical level, and free of internal terminology unless the client uses it first. Status updates on open Critical/High tickets are sent at least once every 4 hours until resolution.

## 6. Priority Levels

---

Priority is set based on business impact reported by the client and validated by Support: Critical (production down or data at risk), High (major feature impaired), Medium (minor feature impaired, workaround exists), Low (question or cosmetic issue).

## Revision History

---

| Version | Date        | Author       | Summary of Changes                                       |
|---------|-------------|--------------|----------------------------------------------------------|
| 1.0     | 01 Mar 2021 | L. Aït Ahmed | Initial release.                                         |
| 2.0     | 01 Jul 2024 | L. Aït Ahmed | Added Slack Connect channel for Enterprise-tier clients. |

| Version | Date        | Author       | Summary of Changes                                      |
|---------|-------------|--------------|---------------------------------------------------------|
| 2.2     | 01 Mar 2026 | L. Aït Ahmed | Tightened Critical first-response target to 30 minutes. |
