1. Purpose

This document gives Sogno Enterprise employees a working understanding of the company's product line, target customers, and roadmap direction, without requiring engineering-level detail.

2. Sogno Enterprise Products

- **SentinellQ** — AI-driven threat detection platform monitoring network and endpoint telemetry.
- **EnterpriseAI** — retrieval-augmented internal knowledge assistant with role-based access control.
- **VaultLayer** — data-classification and access-governance suite.

3. Product Features

- **SentinellQ**: real-time anomaly detection, automated containment recommendations, SIEM integrations.
- **EnterpriseAI**: natural-language search across company documentation, per-role access filtering, source citation on every answer.
- **VaultLayer**: automated data classification, access-review workflows, audit-ready reporting.

4. Target Customers

Mid-size and large organizations (200–5,000 employees) in regulated or security-conscious sectors: financial services, telecom, and government-adjacent enterprises across North Africa, the Gulf, and Southern Europe.

5. Product Terminology

- **Tenant** — an individual customer's isolated environment within the platform.
- **Detection** — a SentinellQ alert generated from telemetry analysis.
- **Knowledge Source** — a document or system connected to EnterpriseAI for retrieval.

6. Roadmap Overview

At a high level, near-term roadmap priorities are expanding EnterpriseAI's connector library, adding automated remediation actions to SentinellQ, and deepening VaultLayer's integration with the other two products for unified access governance. Detailed roadmap timing is maintained by Product and shared quarterly, not in this document.

7. Product Teams

Each product line has a dedicated squad within Product Engineering (see Engineering Handbook, SGN-ENG-01), paired with a Product Manager from the Customer Success & Product department.

Revision History

Version	Date	Author	Summary of Changes
1.0	01 Sep 2023	L. Aït Ahmed	Initial release, covering SentinellQ and Vault-Layer.
2.0	01 Mar 2026	L. Aït Ahmed	Added EnterpriseAI product entry and up-dated target-customer profile.
