

SOGNO ENTREPRISE

SOFTWARE RELEASE PROCEDURE

Corporate Knowledge Base — Engineering Reference Manual

Document Code: SGN-ENG-03 | Version 2.1
Effective Date: 01 March 2026

Document Title	Software Release Procedure
Document Code	SGN-ENG-03
Version	2.1
Effective Date	01 March 2026
Next Review Date	01 March 2027
Document Owner	Engineering Department
Classification	Internal — All Employees
Prepared by Engineering Department Yacine Boumediene <i>VP of Engineering</i>	Approved by Executive Committee Farid Boudiaf <i>Chief Technology Officer, Sogno Enterprise</i>

CONFIDENTIAL — FOR INTERNAL USE ONLY

Unauthorized distribution outside Sogno Enterprise is prohibited.

7 Post-Release Monitoring	2
Revision History	2

1. Purpose

This procedure describes how Sogno Enterprise plans, tests, and deploys software releases across its product lines.

2. Release Planning

Releases follow a 2-week cadence for SentinelIQ and VaultLayer, and continuous deployment (multiple releases per day, behind feature flags) for EnterpriseAI. Release scope is finalized 3 working days before the scheduled release date.

3. Testing

Every release candidate passes the automated regression suite and, for major releases, a manual QA pass on critical user flows. Security-sensitive changes additionally require sign-off from Security Research.

4. Approval

Standard releases are approved by the relevant squad lead. Major or breaking-change releases require sign-off from the VP of Engineering and, for customer-facing breaking changes, the VP of Customer Success & Product.

5. Deployment

Deployments use a canary strategy: 5% of traffic for 30 minutes, then progressive rollout to 100% over 2 hours if error rates remain within threshold (under 0.5% increase over baseline).

6. Rollback

Any release causing error rates above threshold, or a Critical/High incident per Engineering Incident Management (SGN-ENG-04), is rolled back immediately by the deploying engineer without requiring additional approval.

7. Post-Release Monitoring

The deploying team actively monitors dashboards for 2 hours after a major release and reviews key metrics again 24 hours later before closing out the release.

Revision History

Version	Date	Author	Summary of Changes
1.0	01 Jun 2020	Y. Boumediene	Initial release.

Version	Date	Author	Summary of Changes
2.0	01 Oct 2024	Y. Boumediene	Moved EnterpriseAI to continuous deployment.
2.1	01 Mar 2026	Y. Boumediene	Tightened canary error-rate threshold to 0.5%.
