Revision History	2

1. Purpose

This policy covers the configuration, use, and return of company-owned devices.

2. Company Laptops

All employees receive a company-managed laptop enrolled in the mobile device management (MDM) system before their start date. Laptops are standardized to two configurations (engineering and standard office) to simplify support.

3. Device Configuration

All devices ship with disk encryption enabled, an approved endpoint-protection agent, automatic OS updates, and screen lock after 5 minutes of inactivity.

4. Software Installation

Employees may install software needed for their role. Engineering roles have local admin rights; other roles request software installation through the IT helpdesk, with a target turnaround of 1 working day.

5. Updates

Security patches are pushed automatically and must be installed within 72 hours of release. Devices that miss two consecutive patch cycles are flagged for IT follow-up.

6. Lost or Stolen Devices

Any lost or stolen device must be reported to security@sogno-entreprise.com within 1 hour of discovery so it can be remotely locked and wiped.

7. Device Return

All company devices must be returned to IT within 5 working days of the employee's last day. Devices not returned within 30 days are treated as lost per Section 5.

8. Personal Devices

Personal devices (BYOD) may access company email and Slack via an MDM-managed profile only; personal devices may not access production systems or customer data under any circumstance.

Revision History

Version	Date	Author	Summary of Changes
1.0	01 Sep 2019	M. Hadj	Initial release.
2.4	01 Mar 2026	M. Hadj	Added BYOD restrictions and 72-hour patch requirement.
