Revision History	3

1. Purpose

This policy establishes the baseline security requirements for all systems, devices, and employees at Sogno Entreprise. It is the umbrella policy under which the Password & Authentication Policy (SGN-IT-02), Device Management Policy (SGN-IT-03), and others sit.

2. Security Responsibilities

Every employee is responsible for protecting the devices, credentials, and data they are entrusted with. The IT & Security department is responsible for the underlying infrastructure, monitoring, and incident response.

3. Device Security

All company devices must have disk encryption, an approved endpoint-protection agent, and automatic security updates enabled. See the Device Management Policy (SGN-IT-03) for full requirements.

4. Network Security

Access to internal systems from outside the office requires the company VPN. Guest Wi-Fi is isolated from the internal network. Production infrastructure is only reachable through the security team's bastion host.

5. Data Protection

Data must be classified and handled per the Data Protection & Privacy Policy (SGN-IT-06). Customer data may never be copied to personal devices or personal cloud storage.

6. Authentication

Multi-factor authentication (MFA) is mandatory on all company accounts. See the Password & Authentication Policy (SGN-IT-02) for detailed requirements.

7. Incident Reporting

Suspected security incidents — phishing, malware, lost devices, unauthorized access — must be reported to security@sogno-entreprise.com within 1 hour of discovery. See the Security Incident Response Guide (SGN-IT-05).

8. Remote Access

Remote access to production systems requires VPN plus MFA and is logged. Standing production access is reviewed quarterly and revoked for anyone who has not used it in 60 days.

Revision History

Version	Date	Author	Summary of Changes
1.0	01 Sep 2019	M. Hadj	Initial release.
3.0	01 Feb 2024	M. Hadj	Mandated MFA on all accounts.
4.2	01 Mar 2026	A. Cherfaoui	Added quarterly access review requirement for production systems.
