## 1. Purpose

---

This plan describes how Sogno Entreprise maintains critical operations during a business disruption — office outage, natural event, extended power or internet failure, or public-health disruption.

## 2. Business Disruptions in Scope

---

Office inaccessibility, extended utility or connectivity outage, key-system outage (see Engineering Incident Management, SGN-ENG-04, for pure technical incidents), and regional emergencies affecting staff safety.

## 3. Emergency Procedures

---

1. Operations confirms the nature and expected duration of the disruption.
2. Employees are notified via SMS and #announcements within 30 minutes of confirmation.
3. Critical-function employees (identified in Section 4) shift to the documented continuity arrangement for their function.

## 4. Communication

---

The Operations Manager is the designated communication lead during a disruption, with the COO as backup. Updates are issued at least every 4 hours until resolution.

## 5. Critical Operations

---

- Customer-facing security monitoring (SentinelIQ) — must remain operational; engineering on-call can work fully remotely.
- Payroll processing — Finance maintains a documented remote fallback to avoid missed pay dates.
- Customer support — Support team can operate fully remote with existing tooling.

## 6. Employee Responsibilities

---

Employees must keep their emergency contact information current in the HR portal and follow instructions issued through official channels (SMS, #announcements) during a declared disruption.

## 7. Recovery Procedures

---

Once the disruption is resolved, Operations confirms office/system readiness, notifies employees of the return-to-normal timeline, and a post-disruption review is documented within 10 working days.

## Revision History

---

| Version | Date        | Author     | Summary of Changes                                 |
|---------|-------------|------------|----------------------------------------------------|
| 1.0     | 01 Mar 2020 | K. Rahmani | Initial release.                                   |
| 2.0     | 01 Jun 2023 | K. Rahmani | Added critical-operations mapping by function.     |
| 2.2     | 01 Mar 2026 | K. Rahmani | Added Oran hub to notification and recovery scope. |
